

## Alternative recording option

record a lecture that can be added to your D2L site

### About this option...

The teaching station PC in each of the rooms below will automatically record computer content (eg. PowerPoint) and **audio only** for the following classes through 29 April. If you lecture from a PowerPoint Slide deck, your resulting digital file would be a video of you narrating over the slideshow.

### How to...

You just need to show up at your regularly scheduled classroom at the usual time and teach to an empty room. The recordings have been scheduled and are set to automatically start and finish. Note that there is no need to project your content on the large screen. Recordings begin right at regularly scheduled lecture start times and end five minutes after scheduled end.

**Important: make sure that the computer is powered on when you arrive and when you leave.**
