Health Law

ONLINE GRADUATE CERTIFICATE PROGRAM IN REGULATORY SCIENCE

Lead Innovation in Regulatory Science

Join an internationally recognized graduate program in regulatory science. This certificate enables students to accelerate the development of medical products by learning the ethics, policies, and regulations governing regulatory science at federal and global levels.

Build Your Own Career

There is a large and growing need for pharmaceutical and medical device professionals, regulators, business leaders, and scientists to have specialized training in translating research into new interventions for safe and effective medical products.

Learn Core Concepts

- Learn how the FDA is structured and regulates drugs, biologics, devices, and diagnostics
- Study human subjects protection in clinical trials
- Explore intellectual property and the role of patents in commercialization
- Navigate the path from research to bringing a drug to market

12 Months, 100% Online

This program consists of 13 credits (four courses at 3 credits each, and a 1-credit colloquium) that can be completed within a year. The colloquium features leaders in the field presenting on cutting-edge issues in regulatory science.

All credits may be applied to a Master of Legal Studies degree.

Let us help you become a legal expert in Regulatory Science.
